- Unit supported on 1-5/8" diameter 16 gauge wall polished stainless steel tubular legs with fully welded 1-5/8" cross bracing
- Multiple EZ rack station configurations available
- Smooth operation with low amp draw

POWER ROLLER CONVEYOR

The Bi-line EZ Rack power roller system is designed for quick, efficient loading of the dishmachine. Power roller conveyor transfers dish racks thru curve or straight runs directly into the dishmachine allowing the operator to focus on scrapping and loading of dish racks. Once the dish rack is loaded, there is a quick and EZ transition onto power roller with minimal effort.

SPECIFIER STATEMENT

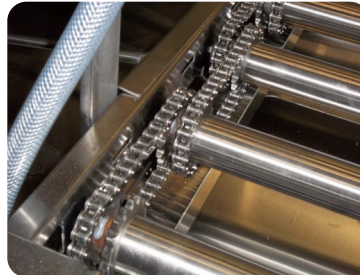

Specified Unit will be Bi-line Model PR22 power roller conveyor designed for quick, efficient loading of the dishmachine. Power roller conveyor transfers dish racks thru curve or straight runs directly into the dishmachine. Roller racking stations provided for easy transition of loaded racks onto power roller with minimal effort.
